

Parts of a Bee

A bee is an insect. Just like all insects the bee has three body parts and **six** legs

The bee's body is divided up as

1. the head
2. the thorax
3. the abdomen

A bee has **four** wings divided up as a large and a small wing on each side of the thorax

A bee has **two** antennae which it uses for smell and for feeling

A bee has **one** tongue known as a proboscis which it uses to drink nectar and water

Can you label the bee below?

The first one has been done for you

Abdomen
